How To Make Title Page

```
\documentclass{beamer}
\title{ title }
\author{ name }
\institute{IITB}
\date{ \today }
\begin{document}
\maketitle
\end{document}
```

Transliteration

Its very fascinating how Latex can display other languages than English using trans literation. For example below code produces output as follows:-

```
\documentclass{article}
\usepackage{devanagari}
\begin{document}
\centering
{\dn .o}
{\dn aCA}
\end{document}
```
